

# February 9<sup>th</sup>, 2012 Addressing Meeting Agenda

## **2:00 - 2:20      911 Call Flow**

- When a 911 Call is placed, what information is automatically received by the dispatcher, and where does the information come from?
- Address Points vs. Road Centerline address matching

## **2:20 – 3:15      911 Addressing workflow**

- Review flow chart, revise if necessary
  - Cities send data to county for input into GIS system.
  - 911 gets addressing map data from county, which is linked to CenturyLink database before being sent to dispatchers
  - Changes to the CenturyLink database happens through customer requests, Jason's updates, and...?
  - GIS has audited against the CenturyLink db and were in 100% compliance in July 1<sup>st</sup>, 2009. Jason continues these audits today per the April 2009 transition plan.
  - If needed, GIS is willing to assist the cities to set up an audit process to ensure their records are represented correctly in the GIS database.

## **3:15 – 3:30      Flathead County's addressing resolution 1626B**

- Defines which roads require names and how addresses are assigned
- Review process that occurs when the county re-addresses an address & the subsequent process that occurs to update data in 911.
- Discussion: do any of the cities ever do readdressing or see a need for re-addressing within the cities?

## **3:30 – 3:45      Discussion: Is there a desire for a Joint Addressing Working Group? If so, who is the contact from each jurisdiction? Timeframe for next meeting?**

## **3:45 – 4:00      Other?**
